- A new category in rodent control technology.
- Maximum tamper-resistant rodenticide, glue board or rat snap trap placements.
- The “ONE” for sensitive accounts.
- Enhances your professional image.

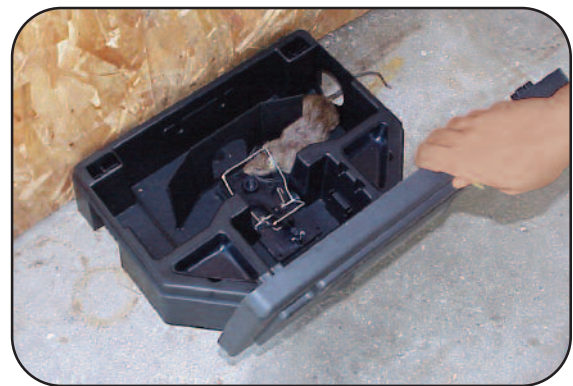

Aegis® Modular System, an evolution in rodent control!

When you need a multi-functional system, when you need to conceal your work, or when you need flexibility in your rodent control program, you need the Aegis Modular System! The Aegis Modular System allows you to perform quality work in a minimum amount of time.

- Maximizes your profits; fastest to service, one modular system to the next.
- The “ONE” for IPM in schools, food service, hospitals and other sensitive accounts.
- Prevents access by non-target pets and people.
- One universal key opens all Aegis products.
- Lid opens away from wall and provides a convenient surface for recording service information.
- Long service life, rotating hinge and heavy-duty construction means less replacement and lower cost.
- Remove bait tray and insert the Kness Big Snap-E® rat trap for tamper-resistant trapping.
- Remove baffle and insert the Atlantic Paste 48R glue board for monitoring/control of rodents.
- Drain holes keep bait drier, fresher and more palatable.
- Vertical and horizontal rods secure Generation™ or Maki® mini-blocks.
- Anchor points provide securing options.
- Easy to service and clean.

The modular system allows concealment of glue board rodent control.

The modular system becomes a convenient way to snap trap rats with the Kness Big Snap-E.
