- **Aegis Rat Bait Station is the fastest to service.**
- **Adapt to baiting needs: black, white (“Cool Box”), and clear-lid models.**
- **Straight-through entry/exit design promotes maximum feeding and control.**

Aegis® Rat Bait Station, the foundation of your baiting program!

Tamper-resistant placement of rodenticide is key in a rodent control program. Fast, convenient access to the Aegis station allows PCOs to perform quality work in a minimum amount of time.

- Maximizes PCO profits; fastest to service, one station to the next.
- Prevents access by non-target pets and people.
- Straight-through design enhances overall rodent feeding.
- Long service life, rotating hinge and heavy-duty construction for less replacement and lower cost.
- One universal key opens all Aegis bait stations.
- Clear-lid model for easy viewing of bait or critters hiding in the station. Best used in shaded areas or indoors.
- White “Cool Box” model helps reduce bait melting. Great for direct sun locations and next to concrete structures (aesthetics).
- Vertical and horizontal rods secure Generation or Maki mini-blocks.
- Drain holes keep bait drier and more palatable.
- Anchor points provide securing options.
- Easy to service, clean and secure.
- Tamper-proof.

Designed to give rats and mice a secure feeling for maximum bait consumption.

Easily secures to perimeter fencing as part of a complete rodent control program.
