

Pesticide Application Notification

Company:
Manager (or responsible person):
Property address:

Date of application:
Time of application:
End of application:
Property or area on property to be treated*:

Name of pesticide: Cardinal Food Plant 5-1
Active ingredient: Pyrethrin and Piperonyl butoxide

Precautions related to protection of employees or other persons during the application:

Cardinal Food Plant 5-1 contains natural pyrethrum which is manufactured from chrysanthemum flowers and Piperonyl butoxide, which has no insecticidal activity by itself. These products are formulated with an oil similar to mineral spirits, which can irritate the lungs, skin, and eyes if respiratory protection is not worn when exposed. If an employee detects any unfamiliar odor around the property that has been treated, evacuate the area until it can be determined to be safe. If an employee has to enter the treated area, personal protective equipment must be worn, including goggles, N95 respirator or organic vapor cartridge with pre-filter, long sleeves/pants and shoes with socks. Do not reenter area without respiratory protection until the fog has settled.

*The operator of the property shall assure that notice is given to all persons who are on the property to be treated, or who may enter during the application or the period of time that any restrictions on entry are in effect, except for the persons who made or supervised the application for which the notice is intended. The notice must be in a manner the person can understand.
