

A balanced blend of speed, quality and performance.

- Exclusive, quick-to-service locking system
- Strong mechanical hinges¹ secure lid; operates even in extreme cold temperatures
- "See the exit before entry" (SeBe) design lures rodents
- Pre-applied bar code¹ for easy scanning

¹ Available on most Aegis stations

Aegis®-RP

Bait Stations

Aegis-RP: The station that saves time and money.

This high-performing, tamper-resistant bait station is for those that value faster service and reduced labor cost.

Fast—Quick-to-service locking system offers unmatched opening speed, so you can service each station quicker.

Convenient—Lid opens away from wall for faster servicing.

Enticing—"See the exit before entry" (SeBe) design lures rodents.

Strong—Mechanical hinge secures lid and operates down to -20° F for long service life.

Flexible—Design allows vertical mounting for tight or water-prone areas.

Smart—Place traps safely in either station position.

Versatile—Accommodates bait, glue boards or traps.

Cleanliness—Rounded interior sides result in easy and fast station clean out.

Dryness—Keep bait fresh with four fast-draining holes.

Adaptable—Knock-out anchor points provide flexible securing options.

Choices—Vertical and horizontal bait rods included.

Color—Gray blends with surroundings and helps reduce bait melt.

New Features

Making the Industry's Best Bait Station Better

Improved Efficiency, Effectiveness & Convenience

New SecureV™ Technology—
Reduces the ability of animals
to free the bait; compatible with
snap traps.

Elevated Horizontal Rods—
Prevents bait from touching
station bottom keeping bait
drier and fresher; ideal for
soft bait.

Material—Station made with
recycled material.

Additional Holes—Provide
versatile security options,
great for zip ties or U-bolts.

Improved Drainage—
Enlarged holes keep bait drier.

SeBe—Train tunnel entrance
allows for more direct access.

Improved Opening—Ramped
opening makes runway
cleaning easier and faster
while impeding water from
entering the station.

Aegis®-RP Anchor

Aegis Anchor: The standard in security and professionalism.

The Aegis-RP is available pre-assembled with the Aegis Anchor. Save labor costs—just open, bait, lock and go.

Secure—Bolt system strongest method for attachment.

Professional—Great looking design enhances your image.

Savings—Less time assembling means more time servicing.

Durable—Architectural-grade concrete lasts in tough environments.

- Bait station made with recycled material
- Bolt embedded in concrete for maximum holding power
- Over 12¹/₂ lbs. of concrete assures the station will stay where you put it
- No more hassle with glue, drills, screws or paving stones
- Quick-release wing nuts for cleaning or moving
- Packaged so product looks new the first day you use it
- Built to last: It still looks good and works well years later
- Strengthening fibers embedded in the concrete for extra durability
- Fastened using two bolts, washers and wing nuts
- Building-grade concrete adds professional look
- Concrete manufactured to the industry's highest standards
- Aegis Anchor fits flush against wall, offers no harborage
- RP can still be vertically oriented for tight places even with the concrete attached
- Can only be detached by opening station with the Aegis key

Aegis® Rat/Modular

Bait Stations

Aegis Rat: Versatile station available in different colors.

Options—Available in all black or all white, or with a clear lid.

Allows Trapping—Baffle protects prying fingers.

- SeBe² design improves rodent entry
- Strong construction means less replacement and lower cost
- Clear-lid model for easy viewing of bait or rodents hiding; best used in shaded areas or indoors³
- White 'cool box' model helps reduce bait melt; great for direct sun locations and blends well near concrete structures
- Drain holes keep bait drier and more palatable
- Easy to service, clean and secure

Aegis Modular: The multi-function rodent bait station solution.

Adjustable—Use for all types of rodent control.

Heavy Duty—Durable and can take a beating.

- SeBe² design improves rodent entry
- Great for IPM in schools, hospitals, food service and other sensitive accounts
- Lid opens away from wall and provides convenient recording surface area
- Long service life with mechanical hinge and heavy-duty construction
- Accepts Kness Big Snap-E® or Victor® Power Kill
- Works with glue boards like the AP&G 48R
- Use with non-toxic monitoring bait or rodenticides

A E G I S®

Aegis[®] Mouse

Bait Stations

Aegis Mouse: Competitive price with more features.

With dual bait chambers for additional feeding and a secure method of attaching bait in the station, this economical alternative outperforms other stations.

Secure—Best mouse station to hold soft bait with SecurePoint.[™]

High Capacity—Holds two blocks, reducing service calls.

Easy Open—Use same universal key to enter station.

Adaptable—Straight-through entry/exit (SeBe²) design promotes feeding and control.

- SeBe² design promotes feeding and control
- SecurePoint technology holds bait, including soft bait, tight in station
- Holds two blocks, reducing service calls
- Clear lid model allows easy viewing of bait³
- Mechanical hinge on clear lid station extends service life
- All-black model performs well at an economical price
- Easily fits into tight locations
- Knock-out holes for flexible options

² SeBe = See the exit before entry

³ Clear lid not recommended in direct sunlight

Aegis®

Bait Stations

Features that make the difference.

All black boxes may look the same, but features in the Aegis tamper-resistant family of products prove that Aegis delivers the highest quality at a competitive price. You can get in, get out and get on with servicing your customers.

One Key—The Aegis key easily opens all Aegis stations.

Dryness—Drain holes in rodent bait stations keep bait fresh and palatable.

Longevity—Door-like hinges are long lasting!

Encouragement—“See the exit before entry” (SeBe) design lures rodents.

Less Travel—A shorter distance between the rodent and the bait means success.

Accessible—Use both hands; rodent stations open away from the wall so you don't have to fight against the lid!
