

When business demands a **superior pest control** solution...

You have enough to keep you busy. The last thing you need to worry about is pest problems at your facility. That's why there's ProFume® gas fumigant.

ProFume effectively controls the stored product pests that may infest your facility and commodities. Using Precision Fumigation™ techniques, ProFume can be applied over a flexible time period and adapted to your business needs and schedule, allowing you to continue producing quality products with minimal downtime.

What's more, ProFume is brought to you by Dow AgroSciences, the experienced pest management leader with a proven history in successful fumigation.

When business demands flexibility...

To enhance effectiveness and alleviate the downtime associated with fumigation, ProFume[®] gas fumigant is administered using Precision Fumigation[™] techniques. This unique and powerful decision-making tool allows you to evaluate a variety of factors that affect control before finalizing a customized fumigation management

plan for your business. Factors like pest biology, environment, exposure time and sealing effectiveness are all reviewed and then integrated into the plan to help optimize dosage, application rates and timing.

PRECISION
FUMIGATION[™]

...get precisely what you need.

By considering all control variables, Precision Fumigation techniques provide flexibility to meet your business needs and time schedule. Which means more utilized production time and profit potential. Precision Fumigation also ensures ProFume gas fumigant is used more efficiently – giving you superior pest control with less downtime to help manage costs.

On-target innovation.

The ProFume gas fumigant Fumiguide™ calculator is the key to evaluating and planning the application of ProFume utilizing Precision Fumigation techniques. This innovative computer-based program calculates dosages based on input of fumigation variables such as pest biology, production time and environment. By allowing the fumigator to quickly modify any fumigation variable, the program helps customize and optimize a fumigation management plan for each situation.

Gas Fumigant

When business demands experience...

When it comes to product support, ProFume[®] gas fumigant is backed by the best. Dow AgroSciences has more than 40 years of fumigation experience and is committed to product support and development through ongoing research and stewardship efforts. This expertise and dedication to pest management is reflected in ProFume and the superior pest control it provides.

...get the support of a leader.

Dow AgroSciences also offers you unprecedented customer support. Through concentrated and continuous application training, applicators who use ProFume gas fumigant learn the most effective application methods and highest practice standards required by Dow AgroSciences and state authorities.

...ProFume delivers.

Your reputation relies on producing a quality pest-free product – count on ProFume gas fumigant to help you do exactly that. ProFume gives you effective, broad-spectrum control of stored product pests so the integrity of your facility and commodities are not compromised.

Choose ProFume for:

- ✓ **BROAD-SPECTRUM CONTROL** – effective on all life stages of insects and rodents.
- ✓ **NON-CORROSIVE ACTIVITY** – ProFume will not damage equipment, electronics and/or buildings when used properly.
- ✓ **FLEXIBILITY** – ProFume gas fumigant, through Precision Fumigation techniques, can be adapted for long or short exposure times to accommodate business schedules.
- ✓ **NON-FLAMMABLE** – the odorless, colorless gas vaporizes rapidly and is not flammable or explosive.
- ✓ **LOW REACTIVITY** – as a gas, no reaction with materials to form unpleasant odors.
- ✓ **QUICK DISTRIBUTION, PENETRATION & AERATION** – the gas promptly distributes to where the pests are and aerates rapidly when ventilation begins.
