Aegis®-RP

Bait Stations

Aegis-RP: The fast-to-open station that saves time and money.

This high-performing bait station is for those who know that faster service reduces labor cost.

Fast—Quick-to-service locking system offers unmatched opening speed, so you can service each station quicker.

Convenient—Lid opens away from wall for faster servicing.

Enticing—"See the exit before entry" design lures rodents.

Strong—Mechanical hinge secures lid and operates down to -20° F for long service life.

Flexible—Design also allows vertical mounting for tight or water-prone areas.

Smart—Place traps safely in either station position.

Versatile—Accommodates bait, glue boards or traps.

Cleanliness—Rounded interior sides result in easy and fast station clean out.

Dryness—Keep bait fresh with four fast-draining holes.

Secure—Save time using cables with pre-drilled holes.

Adaptable—Knock-out anchor points provide flexible securing options.

Choices—Vertical and horizontal bait rods included.

Aegis-RP Gray Bait Station: Advanced rodent control technology in a commercial design.

The industry's best bait station is easy to service, blends better with surroundings and offers a cool lure to rodents.

- Cooler internal temperature reduces bait melt
- Lighter color blends well against concrete and other building material

AEGIS-RP

Aegis[®]-RP Anchor

Bait Station Anchor

Aegis Anchor: A new standard in security and professionalism.

The Aegis-RP is now available pre-assembled with the Aegis Anchor. Save labor costs—just open, bait, lock and go.

Secure—Bolt system strongest method for attachment.

Professional—Great looking design complements the RP.

Savings—Less time assembling means more time servicing.

Quality—Most professional way to secure a station.

- Bolt embedded in concrete for maximum holding power
- Over 12¹/₂ lbs. of concrete assures the station will stay where you put it
- No more hassle with glue, drills, screws or paving stones
- Quick-release wing nuts for cleaning or moving
- Professionally packaged; carton of two weighs only 28 lbs.
- Packaged so product looks new the first day you use it
- Built to last: It still looks good and works well years later
- Strengthening fibers embedded in the concrete for extra durability
- Fastened using two bolts, washers and wing nuts
- Building-grade concrete adds professional look
- Concrete manufactured to the industry's highest standards
- Aegis Anchor fits flush against wall, offers no harborage
- RP can still be vertically oriented for tight places even with the concrete attached
- Can only be detached by opening station with the Aegis key

Aegis® Rat/Modular

Bait Stations

Aegis Rat: Versatile station available in different colors.

Options—Available in all black or all white, or with a clear lid.

Allows Trapping—Baffle protects prying fingers.

- See-through design improves rodent entry
- Strong construction means less replacement and lower cost
- Clear-lid model for easy viewing of bait or rodents hiding; best used in shaded areas or indoors
- White 'cool box' model helps reduce bait melt; great for direct sun locations and blends well near concrete structures
- Drain holes keep bait drier and more palatable
- Easy to service, clean and secure

Aegis Modular: The multi-function rodent bait station solution.

Adjustable—Use for all types of rodent control.

Heavy Duty—Durable and can take a beating.

- See-through design improves rodent entry
- Great for IPM in schools, hospitals, food service and other sensitive accounts
- Lid opens away from wall and provides convenient recording surface area
- Long service life with mechanical hinge and heavy-duty construction
- Accepts Kness Big Snap-E® or Victor® Power Kill
- Works with glue boards like the AP&G 48R
- Use with non-toxic monitoring bait or rodenticides

A E G I S®

Aegis® Mouse

Bait Stations

Competitive price with more features.

With dual bait chambers for additional feeding and a secure method of attaching bait in the station, this economical alternative outperforms other stations.

Secure—Best mouse station to hold soft bait with SecurePoint.™

High Capacity—Holds two blocks for better control.

Easy Open—Use same universal key to enter station.

Adaptable—Straight-through entry/exit design promotes feeding and control.

- Straight-through entry/exit design promotes feeding and control
- New SecurePoint fasteners hold bait, including soft bait, tight in station
- Clear lid model allows easy viewing of bait
- Mechanical hinge on clear lid station extends service life
- All-black model performs well at an economical price
- Easily fits into tight locations
- Knock-out holes for flexible options

Aegis®

Bait Stations

Features that make the difference.

All black boxes may look the same, but features in the Aegis family of products prove that Aegis delivers the highest quality at a competitive price. You can get in, get out and get on with servicing your customers.

One Key—The Aegis key easily opens all Aegis stations.

Dryness—Drain holes in rodent bait stations keep bait fresh and palatable.

Longevity—Door-like hinges are long lasting.

Encouragement—See-through design improves rodent entry.

Less Travel—A shorter distance between the rodent and the bait means success.

Accessible—Use both hands; rodent stations open away from the wall so you don't have to fight against the lid.
